Technical Writer | Documentation Specialist | Technical Editor

PROFESSIONAL SUMMARY

Technical writer and editor with extensive experience in enterprise systems engineering and endpoint management. Experienced in developing user guides, workflow documentation, knowledge base articles, troubleshooting content, and instructional materials for technical teams and end users. Demonstrated success in improving the clarity and usability of documentation, including user guides for OpenOffice Calc, Draw, and Impress. Skilled in translating complex macOS administration and security procedures into clear, audience-focused content using Markdown, GitHub, and DITA-based structured authoring. Portfolio includes technical writing and editing samples in Markdown and GitHub-based formats, foundational DITA work, and an OpenAPI-based API documentation sample developed using a docs-as-code workflow.

SKILLS

Authoring & Publishing: Markdown, DITA, XML, Docs-as-Code, Git, GitHub, GitHub Pages, MkDocs, Atlassian Confluence

Content Strategy: Information Architecture, Structured Authoring, Content Review, Content Effectiveness, Technical Editing

Documentation Types: Technical Documentation, Developer Documentation, API Documentation (Foundational), User Guides, Administrator Documentation, Knowledge Base Articles, Getting-Started Guides, Troubleshooting Content, Process & Workflow Documentation, FAQs.

Development Methodologies: Agile, SME Collaboration, Cross-Functional Communication

Diagramming & Visual Communication: draw.io, Canva, Figma

Enterprise IT & SaaS: Endpoint Management, macOS, iOS, Jamf Pro, Jamf Connect, Jamf Protect, AirWatch, Intune

Tools & Platforms: Microsoft Word, Jira, ServiceNow, Microsoft 365, Git, Bash, AppleScript

EXPERIENCE

Technical Editor – Apache Software Foundation, Forest Hill, MD | *July 2024 – Present*

- Edit OpenOffice user documentation for clarity, consistency, and technical accuracy, with a focus on Calc, Draw, and Impress user guides.
- Enhanced the readability and editorial quality of Calc 4.1, Draw 4.1, and Impress 4.1 user guides to support task completion and user comprehension.

Aether Project Generalist – Outlier AI, Oakland, CA | *December 2025 – Present*

- Review AI-generated content for grammar, clarity, and coherence to strengthen readability, tone, and audience fit across diverse prompts.

macOS Systems Engineer – BlackRock, Inc., San Francisco, CA | *Mar 2018 – Mar 2024*

- Authored and maintained internal technical documentation, including how-to guides, knowledge base content, engineering workflows, and new-technology evaluations.
- Authored getting-started documentation for end users to support onboarding and reduce repeated support questions.
- Created workflow documentation for engineering and support teams, standardizing macOS core processes across IT operations.
- Developed detailed process documentation for a user-elevated-rights automation workflow, reducing manual intervention and supporting IT Support and Help Desk teams by more than 80%.
- Translated complex macOS administration and security procedures into clear, reusable documentation for technical and operational audiences.

Client Engineer – OlsonWorks Consulting Corp (Sephora), San Francisco, CA | *May 2016 – March 2018*

- Documented deployment, imaging, and self-service workflows for macOS enterprise environments, enabling desktop engineers to implement standardized processes.
- Contributed to user and administrator enablement by maintaining self-service environments that improved access to approved software and printer resources.
- Administered Jamf for 500+ macOS devices and supported AirWatch for several thousand mobile devices.
- Streamlined device enrollment workflows through integration of Apple Device Enrollment Program with Jamf.

PROJECTS & CONTRIBUTIONS

Technical writing portfolio: User documentation, knowledge base content, administrator documentation, technical editing samples, API documentation, and introductory DITA-based structured authoring: github.com/MackMike/michael-scarborough-technical-writing-portfolio

Reading List API documentation (portfolio sample): Developer documentation for a fictional REST API, built with an OpenAPI-first, docs-as-code workflow (version-controlled in GitHub): OpenAPI 3.1 specification, generated API reference, task-based quickstart with curl, JavaScript, and Python examples, authentication guidance, and standardized error documentation (RFC 9457), with all examples tested against a Prism mock server. mackmike.github.io/technical-writing-portfolio-site/projects/reading-list-api-project

Contributor, Center for Internet Security (CIS) macOS Benchmarks - contributed technical documentation and security configuration guidance for several benchmarks, including macOS 26 Tahoe.

EDUCATION / CERTIFICATIONS

Monroe Community College | Coursework, nearly 2 years
SUNY New Paltz | Coursework, 1 semester

Introduction to DITA Certificate (2026) — Scriptorium
