Technical Writer / Documentation Specialist / Technical Editor

PROFESSIONAL SUMMARY

Technical writer and editor with expertise in macOS systems, endpoint management, and enterprise IT. Skilled at swiftly mastering complex topics and translating them into clear documentation. Passionate about creating materials for cloud, networking, and security products where clarity impacts customer success. I produce user guides, admin docs, KB articles, troubleshooting guides, workflows, and how-tos for technical teams and users. My strengths include strong writing, technical skills, and a user-focused approach. Portfolio includes Markdown, GitHub, DITA-based work, and editing samples.

CORE SKILLS

Technical Writing • Technical Editing • User Guides • Administrator Documentation • Getting-Started Guides • Troubleshooting Content • Knowledge Base Documentation • Information Architecture • Structured Authoring Fundamentals (DITA) • Web Technologies (HTTP, JSON) • Command-Line Interface • GitHub • Cross-Functional Collaboration

TOOLS & TECHNOLOGIES

Markdown • GitHub • Git • Bash • macOS Terminal • Microsoft Word • Jira • ServiceNow • Microsoft 365 • macOS • Azure • Jamf Pro • Jamf Connect • Jamf Protect

EXPERIENCE

Technical Editor – Apache Software Foundation, Forest Hill, MD | *July 2024 – Present*

- Serve as technical editor for OpenOffice user documentation, with primary responsibility for Calc user guides.
- Review and revise published user guide content for clarity, consistency, usability, structure, and technical accuracy.
- Improved the readability and editorial quality of the Calc 4.1, Draw 4.1, and Impress 4.1 user guides to better support task completion and user comprehension.

Aether Project Generalist – Outlier AI, Oakland, CA | *December 2025 – Present*

- Evaluate and improve AI-generated content for grammar, clarity, coherence, and communication quality.
- Apply editorial judgment to strengthen readability, consistency, tone, and audience appropriateness.
- Support language quality efforts requiring close review of structure, phrasing, and comprehension

macOS Systems Engineer – BlackRock, Inc., San Francisco, CA | *Mar 2018 – Mar 2024*

- Created and maintained internal technical documentation, including how-to guides, knowledge base content, engineering workflows, and evaluations of new technologies.
- Wrote getting-started documentation for end users to support onboarding and reduce repeated support questions.
- Documented workflows for engineers and support teams to improve consistency, knowledge sharing, and process adoption.
- Developed detailed process documentation for a user-elevated-rights automation workflow, reducing manual intervention and supporting IT Support and Help Desk teams.
- Translated complex macOS administration and security procedures into clear, reusable documentation for technical and operational audiences.

Client Engineer – OlsonWorks Consulting Corp, (Sephora), San Francisco, CA | *May 2016 – March 2018*

- Supported documentation and knowledge sharing for deployment, imaging, and self-service workflows in a macOS enterprise environment.
- Contributed to user and administrator enablement by maintaining self-service environments that improved access to approved software and printer resources.
- Administered Jamf for 500+ macOS devices and supported AirWatch for several thousand mobile devices.
- Helped streamline device enrollment workflows through integration of Apple Device Enrollment Program with Jamf.
